👤 PROFILE

I am a dedicated and passionate frontend developer with a strong focus on creating innovative web solutions. With a solid foundation in JavaScript, HTML, and CSS, I enjoy turning designs into pixel-perfect, responsive websites. I thrive in collaborative environments, leveraging my creativity and problem-solving skills to deliver exceptional user experiences.

📁 PROJECTS

Todo List App ✍

- Developed a ReactJS web application for efficient task management.
- Implemented features such as task creation, editing, and deletion.
- Utilized local storage for persistence across browser sessions.

Weather App ✍

- Created a responsive weather application using ReactJS and API integration.
- Enabled users to search for weather forecasts based on location.
- Displayed temperature, humidity, and wind speed information.
- Implemented dynamic background images based on weather conditions.

Personal Portfolio ✍

- Designed and developed a personal portfolio website to showcase my skills, projects, and experiences.
- Implemented an interactive and visually appealing user interface.
- Showcased my frontend development skills using ReactJS, HTML5, CSS3, and other technologies.
- Included project descriptions, contact information, and links to external profiles.es.

Kona Coffee Website ✍

- Developed a visually appealing website for a coffee shop using ReactJS and CSS.
- Implemented an interactive menu and contact form.
- Integrated Google Maps API to display the location.
- Optimized website performance through file size reduction and lazy loading.

👜 PROFESSIONAL EXPERIENCE

T7 Global Bhd

Project Engineer
06/2021 – 11/2022

- Led brownfield project management for oil and gas platform piping systems.
- Collaborated with cross-functional teams to define objectives, manage schedules, budgets, and resources.
- Conducted risk assessments, implemented mitigation strategies, and facilitated procurement.
- Prepared progress reports and presentations for senior management.
